Subject Index of Volume 43/44

Activated reactive evaporation
  Fabrication of aluminum oxide films with high deposition rates using the activated reactive evaporation technique, 213
Adhesion
  Comparative tribological and adhesion studies of some titanium-based ceramics coatings, 888
  Copper–glassy carbon adhesion: improvement through $^{27}Al^+$ implantation, 975
  Effect of film adhesion on tribological properties of silver-coated alumina, 577
  Evaluation of adhesion of some metallic coatings on a depleted U–0.75Ti alloy, 390
  The improvement of the adhesion strength of diamond films, 30
Aero engines
  Thermally sprayed coatings systems for surface protection and clearance control applications in aero engines, 402
Alumina
  Effect of film adhesion on tribological properties of silver-coated alumina, 577
  Electron microscopy studies of niobium films grown by molecular beam epitaxy and Nb–Al_2O_3 interfaces, 199
  Fabrication of aluminum oxide films with high deposition rates using the activated reactive evaporation technique, 213
Aluminide coatings
  In situ measurements of the mechanical properties of aluminide coatings, 359
  Structure and high temperature performance of various palladium-modified aluminide coatings: a low cost alternative to platinum aluminides, 347
Aluminium
  Characterization of aluminium films deposited by ion-beam-assisted ultrahigh vacuum evaporation, 963
  Copper–glassy carbon adhesion: improvement through $^{27}Al^+$ implantation, 975
  Erosion and erosion–corrosion behavior of chromized–aluminized stainless steels at room and elevated temperatures, 836
  Layer structure and mechanical properties of low pressure r.f. plasma nitrided Ti–6Al–4V alloy, 745
  Tribological properties of ceramic–(Ti_3Al–Nb) sliding couples for use as candidate seal materials to 700 °C, 663
  Wear behavior of detonation gun tungsten carbide coated steel *vs.* aluminum, 768
Arc evaporation
  Arc evaporation of hard coatings: process and film properties, 299
Arc ion plating
  Macroparticles on TiN films prepared by the arc ion plating process, 324
  Reduction in macroparticles during the deposition of TiN films prepared by arc ion plating, 312
Arsenic
  Processing of TiN/Ti metallization on silicon by arsenic ion implantation, 996

Boric acid
  A study of the formation and self-lubrication mechanisms of boric acid films on boric oxide coatings, 588
Boron
  A study of the formation and self-lubrication mechanisms of boric acid films on boric oxide coatings, 588
  An ion-plating apparatus incorporating a d.c. plasma gun with an LaB_6 cathode, 1056
  Effect of lattice damage on impurity depth profiles in BF^{2+}-implanted silicon, 986

Ion energy effects on the intrinsic stress in B_xN_y layers deposited by ion-beam-assisted evaporation, 137
Surface processes and rate-determining steps in plasma-induced chemical vapour deposition: titanium nitride, boron carbide and silicon, 154
Synthesis of cubic BN from the gas phase by a new plasma chemical vapour deposition method using r.f. waves and a tungsten filament, 116
The possibility of coating cubic BN films on various substrates, 145
The synthesis of cubic BN films using a hot cathode plasma discharge in a parallel magnetic field, 128
Wear behaviour of r.f.-sputtered TiN, TiB_2 and Ti(B,N) coatings on metal forming tools in a model wear test, 721

Carbon
Chemical and tribological studies of MoS_2 films on SiC substrates, 652
Copper–glassy carbon adhesion: improvement through $27Al^+$ implantation, 975
Corrosion-resistant and hard 310 stainless steel–carbon coatings prepared by reactive d.c. magnetron sputtering, 521
Diamond-like carbon films prepared by various ion-beam-assisted techniques, 71
Influence of organochromium precursor chemistry on the microstructure of MOCVD chromium carbide coatings, 185
Influence of the intrinsic coating properties on the contact mechanical strength of perfectly adhering carbon-doped AISI 310 PVD films, 907
Modification of surface mechanical properties of high chromium tool steel by carbon-implanted codeposited Fe–Ti films, 597
Properties of carbon films produced by r.f. plasma chemical vapour deposition, 813
Superhard Ti–C–C–N coatings, 107
Surface processes and rate-determining steps in plasma-induced chemical vapour deposition: titanium nitride, boron carbide and silicon, 154
Temperature and concentration of SiC deposition on Nicalon fibers, 167
The microstructures and microchemistry of a thermal-diffusion-boronized Co–Cr–W–C alloy, 756
Wear behavior of detonation gun tungsten carbide coated steel *vs.* aluminum, 768
Carbon films
A comparison of the properties of hard carbon films produced by direct gas deposition and plasma-assisted evaporation, 88
Cathode arcs
Characteristics of a dual purpose cathodic arc-magnetron sputtering system, 288
Ceramics
Basic principles of specific applications of ceramic materials as protective layers, 245
Basic study on laser physical vapour deposition of ceramics, 176
Comparative tribological and adhesion studies of some titanium-based ceramics coatings, 888
The use of solid ceramic and ceramic hard-coated components to prolong the performance of perfluoropoly-alkylether lubricants, 609
Tribological properties of ceramic–(Ti_3Al–Nb) sliding couples for use as candidate seal materials to 700 °C, 663
Characterization
Characterization and production, monitoring of thin films using soft X-ray spectroscopy, 1015
Characterization of a 1 kA vacuum arc plasma gun for use as a metal vapour deposition source, 1024
Chemical conversion coatings
Influence of hexadecyl dithiocarbamate on phosphate surface chemical conversion coatings on mild steel, 543
Chlorides
The pitting corrosion of zirconium and zirconium–niobium alloys in sulphate solutions containing chlorides at 300–373 K, 511
Chokes
Evaluation of corrosion–erosion–resistant coatings for WC chokes used in heavy oil production, 848

Chromium
Compositional, microstructural and morphological effects on the mechanical and tribological properties of chromium nitrogen films, 732
Electrochemical and long-term corrosion studies of several alloys in bare condition and plasma sprayed with Cr_2O_3, 567
Erosion and erosion–corrosion behavior of chromized–aluminized stainless steels at room and elevated temperatures, 836
Influence of organochromium precursor chemistry on the microstructure of MOCVD chromium carbide coatings, 185
Modification of surface mechanical properties of high chromium tool steel by carbon-implanted codeposited Fe–Ti films, 597
The microstructures and microchemistry of a thermal-diffusion-boronized Co–Cr–W–C alloy, 756
Chromized coatings
The structure and high temperature corrosion properties of chromized coatings, 493
Clearance control
Thermally sprayed coatings systems for surface protection and clearance control applications in aero engines, 402
Coating design
Interdiffusion and coating design, 371
Cobalt
Material dependence of property modification in ion-assisted evaporation of iron, nickel and cobalt, 936
The microstructures and microchemistry of a thermal-diffusion-boronized Co–Cr–W–C alloy, 756
Cold rolling
Production of electrotechnical cold-rolled sheets with corrosion-resistant coatings, 554
Combustion flame torch
An experiment in large area diamond coating using a combustion flame torch in its traversing mode, 22
Contact mechanical strength
Influence of the intrinsic coating properties on the contact mechanical strength of perfectly adhering carbon-doped AISI 310 PVD films, 907
Copper
Copper–glassy carbon adhesion: improvement through $27Al^+$ implantation, 975
Corrosion
Corrosion performance of layered coatings produced by physical vapour deposition, 481
Development of coatings with improved corrosion resistance in sulfur-containing environments, 821
Electrochemical and long-term corrosion studies of several alloys in bare condition and plasma sprayed with Cr_2O_3, 567
Erosion and erosion–corrosion behavior of chromized–aluminized stainless steels at room and elevated temperatures, 836
Erosion–corrosion of thermal spray coatings, 859
Evaluation of corrosion–erosion-resistant coatings for WC chokes used in heavy oil production, 848
The structure and high temperature corrosion properties of chromized coatings, 493
Corrosion resistance
Corrosion-resistant and hard 310 stainless steel–carbon coatings prepared by reactive d.c. magnetron sputtering, 521
Production of electrotechnical cold-rolled sheets with corrosion-resistant coatings, 554

Damage
Effect of lattice damage on impurity depth profiles in BF^{2+}-implanted silicon, 986
Friction and damage of coatings formed by sputtering polytetrafluoroethylene and polyimide, 618
Friction and damage of floppy disks, 790
Detonation
Wear behavior of detonation gun tungsten carbide coated steel *vs.* aluminum, 768
Diamond
Ion irradiation effects in diamond, 63
Microwave plasma chemical vapour deposition of diamond: its growth and characterization, 53

Diamond crystals
Diamond crystal growth on silicon and its interfacial characterization, 41
Diamond films
An experiment in large area diamond coating using a combustion flame torch in its traversing mode, 22
Preparation and characterization of wide area, high quality diamond film using magnetoactive plasma chemical vapour deposition, 10
The improvement of the adhesion strength of diamond films, 30
Diamond growth
A thermochemical model for diamond growth from the vapour phase, 1
Diamond-like carbon
Diamond-like carbon films prepared by various ion-beam-assisted techniques, 71
Diamond-like carbon films for electroluminescent applications, 99
Diamond-like films
Deposition of diamond-like films by laser ablation, 80
Diffusion
A comparison of several surface treatments for minimizing oxygen diffusion in β-processed titanium-3242 at 800 °C, 381
Direct gas deposition
A comparison of the properties of hard carbon films produced by direct gas deposition and plasma-assisted evaporation, 88
Ductile materials
The performance of high speed steel indexible inserts coated by physical vapour deposition in the milling of ductile materials, 1074

Electrical applications
Ion-assisted coatings for tribiological and electrical applications, 779
Electrochemical corrosion
Electrochemical and long-term corrosion studies of several alloys in bare condition and plasma sprayed with Cr_2O_3, 567
Electroless deposition
Electroless deposition of pure nickel, palladium and platinum, 500
Electroluminescence
Diamond-like carbon films for electroluminescent applications, 99
Electron microscopy
Electron microscopy studies of niobium films grown by molecular beam epitaxy and Nb–Al_2O_3 interfaces, 199
Erosion
Erosion and erosion–corrosion behavior of chromized–aluminized stainless steels at room and elevated temperatures, 836
Erosion of protective coatings, 875
Erosion–corrosion of thermal spray coatings, 859
Evaluation of corrosion–erosion-resistant coatings for WC chokes used in heavy oil production, 848
Evaporation
Characterization of aluminium films deposited by ion-beam-assisted ultrahigh vacuum evaporation, 963

Fatigue
The influence of coating thickness on lubricated rolling contact fatigue life, 669
Flash lamp
Surfprep flash-lamp depaint system evaluation, 1035
Floppy disks
Friction and damage of floppy disks, 790
Fluorine
Effect of lattice damage on impurity depth profiles in BF^{2+}-implanted silicon, 986
Friction
Friction and damage of coatings formed by sputtering polytetrafluoroethylene and polyimide, 618
Friction and damage of floppy disks, 790
Friction and wear properties of titanium nitride coating in sliding contact with AISI 01 steel, 709

Hard coatings
Arc evaporation of hard coatings: process and film properties, 299
The application of hard coatings produced by plasma-assisted chemical vapour deposition, 1007
Heat resistance
Improvements of scale adherence on heat-resisting alloys and coatings by rare earth additions, 336

Hexadecyl dithiocarbamate
Influence of hexadecyl dithiocarbamate on phosphate surface chemical conversion coatings on mild steel, 543

Impurities
Effect of lattice damage on impurity depth profiles in BF^{2+}-implanted silicon, 986
Interdiffusion
Interdiffusion and coating design, 371
Interfacial characterization
Diamond crystal growth on silicon and its interfacial characterization, 41
Ion beams
Characterization of aluminium films deposited by ion-beam-assisted ultrahigh vacuum evaporation, 963
Diamond-like carbon films prepared by various ion-beam-assisted techniques, 71
Ion energy effects on the intrinsic stress in B_xN_y layers deposited by ion-beam-assisted evaporation, 137
Ion bombardment
Ion-assisted coatings for tribological and electrical applications, 779
Ion-assisted sputtering of TiN films, 259
Material dependence of property modification in ion-assisted evaporation of iron, nickel and cobalt, 936
Modification of mechanical and chemical properties of thin films by ion bombardment, 920
Ion implantation
Processing of TiN/Ti metallization on silicon by arsenic ion implantation, 996
Ion irradiation
Ion irradiation effects in diamond, 63
Ion plating
An ion-plating apparatus incorporating a d.c. plasma gun with an LaB_6 cathode, 1056
The deposition of TiN at less than 150 °C by reactive magnetron sputter ion plating, 279
Iron
Material dependence of property modification in ion-assisted evaporation of iron, nickel and cobalt, 936
Modification of surface mechanical properties of high chromium tool steel by carbon-implanted codeposited Fe–Ti films, 597
Isothermal oxidation
Thermal barrier coating life and isothermal oxidation of low-pressure plasma-sprayed bond coat alloys, 446

Lanthanum
An ion-plating apparatus incorporating a d.c. plasma gun with an LaB_6 cathode, 1056
Laser ablation
Deposition of diamond-like films by laser ablation, 80
Lattice damage
Effect of lattice damage on impurity depth profiles in BF^{2+}-implanted silicon, 986
Layered coatings
Corrosion performance of layered coatings produced by physical vapour deposition, 481
Lubricants
The use of solid ceramic and ceramic hard-coated components to prolong the performance of perfluoropolyalkylether lubricants, 609
Lubrication
A study of the formation and self-lubrication mechanisms of boric acid films on boric oxide coatings, 588
Cathodic sputtering for preparation of lubrication films, 629
The influence of coating thickness on lubricated rolling contact fatigue life, 699

Macroparticles
Macroparticles on TiN films prepared by the arc ion plating process, 324
Reduction in macroparticles during the deposition of TiN films prepared by arc ion plating, 312
Magnetrons
Characteristics of a dual purpose cathodic arc-magnetron sputtering system, 288
Corrosion-resistant and hard 310 stainless steel–carbon coatings prepared by reactive d.c. magnetron sputtering, 521

High rate reactive sputtering in an opposed cathode closed-field unbalanced magnetron sputtering system, 270
The deposition of TiN at less than 150 °C by reactive magnetron sputter ion plating, 279
Mechanical properties
In situ measurements of the mechanical properties of aluminide coatings, 359
Mechanochemical interactions
Studies of mechanochemical interactions in the tribological behavior of materials, 799
Metal vapour
Characterization of a 1 kA vacuum arc plasma gun for use as a metal vapour deposition source, 1024
Metallic coatings
Evaluation of adhesion of some metallic coatings on a depleted U–0.75Ti alloy, 390
Microchemistry
The microstructures and microchemistry of a thermal-diffusion-boronized Co–Cr–W–C alloy, 756
Microstructure
Compositional, microstructural and morphological effects on the mechanical and tribological properties of chromium nitrogen films, 732
Influence of organochromium precursor chemistry on the microstructure of MOCVD chromium carbide coatings, 185
The microstructures and microchemistry of a thermal-diffusion-boronized Co–Cr–W–C alloy, 756
Milling
The performance of high speed steel indexible inserts coated by physical vapour deposition in the milling of ductile materials, 1074
Modification of properties
Material dependence of property modification in ion-assisted evaporation of iron, nickel and cobalt, 936
Modification of mechanical and chemical properties of thin films by ion bombardment, 920
Molecular beam epitaxy
Electron microscopy studies of niobium films grown by molecular beam epitaxy and Nb–Al_2O_3 interfaces, 199
Molybdenum
Chemical and tribological studies of MoS_2 films on SiC substrates, 652
Oxygen substitution in sputter-deposited MoS_2 films studied by extended X-ray absorption fine structure, X-ray photoelectron spectroscopy and X-ray diffraction, 640
Morphology
Compositional, microstructural and morphological effects on the mechanical and tribological properties of chromium nitrogen films, 732

Nicalon fibers
Temperature and concentration of SiC deposition on Nicalon fibers, 167
Nickel
Electroless deposition of pure nickel, palladium and platinum, 500
Material dependence of property modification in ion-assisted evaporation of iron, nickel and cobalt, 936
Niobium
Electron microscopy studies of niobium films grown by molecular beam epitaxy and Nb–Al_2O_3 interfaces, 199
The pitting corrosion of zirconium and zirconium–niobium alloys in sulphate solutions containing chlorides at 300–373 K, 511
Tribological properties of ceramic–(Ti_3Al–Nb) sliding couples for use as candidate seal materials to 700 °C, 663
Nitridation
Layer structure and mechanical properties of low pressure r.f. plasma nitrided Ti–6Al–4V alloy, 745
Nitrogen
A novel process for application of titanium nitride coatings, 1047
Aspects of residual stress measurements in TiN prepared by reactive sputtering, 234
Basic properties of sputtered 310 stainless steel–nitrogen coatings, 533
Compositional, microstructural and morphological effects on the mechanical and tribological properties of chromium nitrogen films, 732

Friction and wear properties of titanium nitride coating in sliding contact with AISI 01 steel, 709
Fundamental and tribological properties of r.f.-sputtered TiN coatings in plastic manufacturing model wear tests, 688
Ion energy effects on the intrinsic stress in B_xN_y layers deposited by ion-beam-assisted evaporation, 137
Ion-assisted sputtering of TiN films, 259
Macroparticles on TiN films prepared by the arc ion plating process, 324
Processing of TiN/Ti metallization on silicon by arsenic ion implantation, 996
Reduction in macroparticles during the deposition of TiN films prepared by arc ion plating, 312
Superhard Ti–C–C–N coatings, 107
Surface processes and rate-determining steps in plasma-induced chemical vapour deposition: titanium nitride, boron carbide and silicon, 154
Synthesis of cubic BN from the gas phase by a new plasma chemical vapour deposition method using r.f. waves and a tungsten filament, 116
The deposition of TiN at less than 150 °C by reactive magnetron sputter ion plating, 279
The possibility of coating cubic BN films on various substrates, 145
The synthesis of cubic BN films using a hot cathode plasma discharge in a parallel magnetic field, 128
Wear behaviour of r.f. -sputtered TiN, TiB_2 and Ti(B, N) coatings on metal forming tools in a model wear test, 721

Optical coatings
Ion-assisted reactive deposition processes for optical coatings, 950
Organochromium precursors
Influence of organochromium precursor chemistry on the microstructure of MOCVD chromium carbide coatings, 185
Oxygen
A comparison of several surfacce treatments for minimizing oxygen diffusion in β-processed titanium-6242 at 800 °C, 381
A study of the formation and self-lubrication mechanisms of boric acid films on boric oxide coatings, 588
Electrochemical and long-term corrosion studies of several alloys in bare condition and plasma sprayed with Cr_2O_3, 567
Oxygen substitution in sputter-deposited MoS_2 films studied by extended X-ray absorption fine structure, X-ray photoelectron spectroscopy and X-ray diffraction, 640

Paint removal
Surfprep flash-lamp depaint system evaluation, 1035
Palladium
Electroless deposition of pure nickel, palladium and platinum, 500
Structure and high temperature performance of various palladium-modified aluminide coatings: a low cost alternative to platinum aluminides, 347
Perfluoropolyalkylether
The use of solid ceramic and ceramic hard-coated components to prolong the performance of perfluoropoly-alkylether lubricants, 609
Phosphates
Influence of hexadecyl dithiocarbamate on phosphate surface chemical conversion coatings on mild steel, 543
Physical vapour deposition
Basic study on laser physical vapour deposition of ceramics, 176
Corrosion performance of layered coatings produced by physical vapour deposition, 481
Pitting corrosion
The pitting corrosion of zirconium and zirconium–niobium alloys in sulphate solutions containing chlorides at 300–373 K, 511
Plasma deposition
Calculation of residual thermal stress in plasma-sprayed coatings, 416
Electrochemical and long-term corrosion studies of several alloys in bare condition and plasma sprayed with Cr_2O_3, 567
Modelling of residual stress in plasma-sprayed coatings: effect of substrate temperature, 426
Plasma-sprayed yttria-stabilized zirconia coatings: structure–property relationships, 470

Thermal barrier coating life and isothermal oxidation of low-pressure plasma-sprayed bond coat alloys, 446
Plasma methods
A comparison of the properties of hard carbon films produced by direct gas deposition and plasma-assisted evaporation, 88
A novel plasma surface metallurgy: Xu–Tec process, 1065
An ion-plating apparatus incorporating a d.c. plasma gun with an LaB_6 cathode, 1056
Characterization of a 1 kA vacuum arc plasma gun for use as a metal vapour deposition source, 1024
Developments in r.f. plasma-assisted physical vapour deposition of partially yttria-stabilized zirconia thermal barrier coatings, 436
Microwave plasma chemical vapour deposition of diamond: its growth and characterization, 53
Preparation and characterization of wide area, high quality diamond film using magnetoactive plasma chemical vapour deposition, 10
Properties of carbon films produced by r.f. plasma chemical vapour deposition, 813
Surface processes and rate-determining steps in plasma-induced chemical vapour deposition: titanium nitride, boron carbide and silicon, 154
Synthesis of cubic BN from the gas phase by a new plasma chemical vapour deposition method using r.f. waves and a tungsten filament, 116
The application of hard coatings produced by plasma-assisted chemical vapour deposition, 1007
The synthesis of cubic BN films using a hot cathode plasma discharge in a parallel magnetic field, 128
Platinum
Electroless deposition of pure nickel, palladium and platinum, 500
Polyimide
Friction and damage of coatings formed by sputtering polytetrafluoroethylene and polyimide, 618
Polytetrafluoroethylene
Friction and damage of coatings formed by sputtering polytetrafluoroethylene and polyimide, 618
Production monitoring
Characterization and production monitoring of thin films using soft X-ray spectroscopy, 1015
Protective coatings
Erosion of protective coatings, 875
Protective layers
Basic principles of specific applications of ceramic materials as protective layers, 245

Rare earths
Improvements of scale adherence on heat-resisting alloys and coatings by rare earth additions, 336
Reactive deposition
Ion-assisted reactive deposition processes for optical coatings, 950
Reactive sputtering
Aspects of residual stress measurements in TiN prepared by reactive sputtering, 234
Residual stress measurements
Aspects of residual stress measurements in TiN prepared by reactive sputtering, 234
Rocket engine
Thermal response of various thermal barrier coatings in a high heat flux rocket engine, 458
Rolling contact fatigue
The influence of coating thickness on lubricated rolling contact fatigue life, 699

Sample thinning
The determination of residual stresses in thin coatings by a sample thinning method, 223
Scale adherence
Improvements of scale adherence on heat-resisting alloys and coatings by rare earth additions, 336
Sealing
Tribological properties of ceramic–(Ti_3Al–Nb) sliding couples for use as candidate seal materials to 700 °C, 663
Silicon
Chemical and tribological studies of MoS_2 films on SiC substrates, 652
Diamond crystal growth on silicon and its interfacial characterization, 41

Effect of lattice damage on impurity depth profiles in BF^{2+}-implanted silicon, 986
Processing of TiN/Ti metallization on silicon by arsenic ion implantation, 996
Temperature and concentration of SiC deposition on Nicalon fibers, 167
Soft X-ray spectroscopy
Characterization and production monitoring of thin films using soft X-ray spectroscopy, 1015
Sputtering
Basic properties of sputtered 310 stainless steel–nitrogen coatings, 533
Cathodic sputtering for preparation of lubrication films, 629
Characteristics of a dual purpose cathodic arc-magnetron sputtering system, 288
Corrosion-resistant and hard 310 stainless steel–carbon coatings prepared by reactive d.c. magnetron sputtering, 521
Friction and damage of coatings formed by sputtering polytetrafluoroethylene and polyimide, 618
Fundamental and tribological properties of r.f.-sputtered TiN coatings in plastic manufacturing model wear tests, 688
High rate reactive sputtering in an opposed cathode closed-field unbalanced magnetron sputtering system, 270
Ion-assisted sputtering of TiN films, 259
Oxygen substitution in sputter-deposited MoS_2 films studied by extended X-ray absorption fine structure, X-ray photoelectron spectroscopy and X-ray diffraction, 640
The deposition of TiN at less than 150 °C by reactive magnetron sputter ion plating, 279
Stainless steel
Basic properties of sputtered 310 stainless steel–nitrogen coatings, 533
Corrosion-resistant and hard 310 stainless steel–carbon coatings prepared by reactive d.c. magnetron sputtering, 521
Standardization
Structural and energetic principles of the standardization of tribological tests, 898
Steel
Erosion and erosion–corrosion behavior of chromized–aluminized stainless steels at room and elevated temperatures, 836
Friction and wear properties of titanium nitride coating in sliding contact with AISI 01 steel, 709
Influence of hexadecyl dithiocarbamate on phosphate surface chemical conversion coatings on mild steel, 543
Influence of the intrinsic coating properties on the contact mechanical strength of perfectly adhering carbon-doped AISI 310 PVD films, 907
Modification of surface mechanical properties of high chromium tool steel by carbon-implanted codeposited Fe–Ti films, 597
The performance of high speed steel indexible inserts coated by physical vapour deposition in the milling of ductile materials, 1074
Wear behavior of detonation gun tungsten carbide coated steel *vs.* aluminum, 768
Stress
Aspects of residual stress measurements in TiN prepared by reactive sputtering, 234
Calculation of residual thermal stress in plasma-sprayed coatings, 416
Modelling of residual stress in plasma-sprayed coatings: effect of substrate temperature, 426
The determination of residual stresses in thin coatings by a sample thinning method, 223
Structure
Layer structure and mechanical properties of low pressure r.f. plasma nitrided Ti–6Al–4V alloy, 745
Plasma-sprayed yttria-stabilized zirconia coatings: structure–property relationships, 470
Structural and energetic principles of the standardization of tribological tests, 898
Structure and high temperature performance of various palladium-modified aluminide coatings: a low cost alternative to platinum aluminides, 347

The structure and high temperature corrosion properties of chromized coatings, 493
Substrate temperature
Modelling of residual stress in plasma-sprayed coatings: effect of substrate temperature, 426
Sulphates
The pitting corrosion of zirconium and zirconium–niobium alloys in sulphate solutions containing chlorides at 300–373 K, 511
Sulphur
Chemical and tribological studies of MoS_2 films on SiC substrates, 652
Development of coatings with improved corrosion resistance in sulfur-containing environments, 821
Oxygen substitution in sputter-deposited MoS_2 films studied by extended X-ray absorption fine structure, X-ray photoelectron spectroscopy and X-ray diffraction, 640
Superhard coatings
Superhard Ti–C–C–N coatings, 107
Surface processes
Surface processes and rate-determining steps in plasma-induced chemical vapour deposition: titanium nitride, boron carbide and silicon, 154
Surface protection
Thermally sprayed coatings systems for surface protection and clearance control applications in aero engines, 402
Surface treatments
A comparison of several surface treatments for minimizing oxygen diffusion in β-processed titanium-6242 at 800 °C, 381
Surfaces
A novel plasma surface metallurgy: Xu–Tec process, 1065
Modification of surface mechanical properties of high chromium tool steel by carbon-implanted codeposited Fe–Ti films, 597

Thermal barrier coatings
Developments in r.f. plasma-assisted physical vapour deposition of partially yttria-stabilized zirconia thermal barrier coatings, 436
Thermal barrier coating life and isothermal oxidation of low-pressure plasma-sprayed bond coat alloys, 446
Thermal response of various thermal barrier coatings in a high heat flux rocket engine, 458
Thermal spray coatings
Erosion–corrosion of thermal spray coatings, 859
Thermal stress
Calculation of residual thermal stress in plasma-sprayed coatings, 416
Thermochemical model
A thermochemical model for diamond growth from the vapour phase, 1
Thin coatings
The determination of residual stresses in thin coatings by a sample thinning method, 223
Titanium
A comparison of several surface treatments for minimizing oxygen diffusion in β-processed titanium-6242 at 800 °C, 381
A novel process for application of titanium nitride coatings, 1047
Aspects of residual stress measurements in TiN prepared by reactive sputtering, 234
Comparative tribological and adhesion studies of some titanium-based ceramics coatings, 888
Evaluation of adhesion of some metallic coatings on a depleted U–0.75Ti alloy, 390
Friction and wear properties of titanium nitride coating in sliding contact with AISI 01 steel, 709
Fundamental and tribological properties of r.f.-sputtered TiN coatings in plastic manufacturing model wear tests, 688
Ion-assisted sputtering of TiN films, 259
Layer structure and mechanical properties of low pressure r.f. plasma nitrided Ti–6Al–4V alloy, 745
Macroparticles on TiN films prepared by the arc ion plating process, 324
Modification of surface mechanical properties of high chromium tool steel by carbon-implanted codeposited Fe–Ti films, 597
Processing of TiN/Ti metallization on silicon by arsenic ion implantation, 996
Reduction in macroparticles during the deposition of TiN films prepared by arc ion plating, 312

Superhard Ti–C–C–N coatings, 107
Surface processes and rate-determining steps in plasma-induced chemical vapour deposition: titanium nitride, boron carbide and silicon, 154
The deposition of TiN at less than 150 °C by reactive magnetron sputter ion plating, 279
Tribological properties of ceramic–(Ti_3Al–Nb) sliding couples for use as candidate seal materials to 700 °C, 663
Wear behaviour of r.f.-sputtered TiN, TiB_2 and Ti(B,N) coatings on metal forming tools in a model wear test, 721

Tribology
Chemical and tribological studies of MoS_2 films on SiC substrates, 652
Comparative tribological and adhesion studies of some titanium-based ceramics coatings, 888
Compositional, microstructural and morphological effects on the mechanical and tribological properties of chromium nitrogen films, 732
Effect of film adhesion on tribological properties of silver-coated alumina, 577
Fundamental and tribological properties of r.f.-sputtered TiN coatings in plastic manufacturing model wear tests, 688
Ion-assisted coatings for tribological and electrical applications, 779
Structural and energetic principles of the standardization of tribological tests, 898
Studies of mechanochemical interactions in the tribological behavior of materials, 799
The mechanics of the tribology of thin films systems, 674
Tribological properties of ceramic–(Ti_3Al–Nb) sliding couples for use as candidate seal materials to 700 °C, 663

Tungsten
The microstructures and microchemistry of a thermal-diffusion-boronized Co–Cr–W–C alloy, 756
Wear behavior of detonation gun tungsten carbide coated steel *vs.* aluminum, 768

Uranium
Evaluation of adhesion of some metallic coatings on a depleted U–0.75Ti alloy, 390

Vanadium
Layer structure and mechanical properties of low pressure r.f. plasma nitrided Ti–6Al–4V alloy, 745

Wear
Friction and wear properties of titanium nitride coating in sliding contact with AISI 01 steel, 709
Fundamental and tribological properties of r.f.-sputtered TiN coatings in plastic manufacturing model wear tests, 688
Wear behavior of detonation gun tungsten carbide coated steel *vs.* aluminum, 768
Wear behaviour of r.f.-sputtered TiN, TiB_2 and Ti(B,N) coatings on metal forming tools in a model wear test, 721

Yttria
Developments in r.f. plasma-assisted physical vapour deposition of partially yttria-stabilized zirconia thermal barrier coatings, 436
Plasma-sprayed yttria-stabilized zirconia coatings: structure–property relationships, 470

Zirconia
Developments in r.f. plasma-assisted physical vapour deposition of partially yttria-stabilized zirconia thermal barrier coatings, 436
Plasma-sprayed yttria-stabilized zirconia coatings: structure–property relationships, 470

Zirconium
The pitting corrosion of zirconium and zirconium–niobium alloys in sulphate solutions containing chlorides at 300–373 K, 511
